

SPRINT 3 MEETING LOG (-div-velopers)

MEETING 1: 25 April 2026 (eveyone expect Kwezi attended - wifi issue at residence)

Meeting Start: 10:07	
Meeting End: 10:22	
Meeting Transcript	-10:07 ziya agreed to assist sindy with fixing the codebase -10:07 payment integration task single person or split between people? - critical high priority between the next two sprints - can give each person a task to do -10:10 sprint 3 get critical and high priority out of the way and medium and low priority in sprint 4 -10:11 payment task can be worked on by two people Alondwe and Sindy - firestore security roles fixed (ziya) -10:12 current firestore rules dont have membership collections/member subgroups collection -10:13 payment contribution link/system (athandwa) -10:14 invite system (owen) -10:20 tesing/integration (kwezi)

	-10:21 yoko/peach payment (enterprise option/overkill for stokvel) - we'll use Yoko -10:22 sindy will send the document - meeting end 10:23
--	---

MEETING 2: 1 May 2026 (everyone expect Kwezi attended - wifi issue at residence)

Meeting Start: 11:10	
Meeting End: 11:23	
Meeting Transcript:	11:11 Sindy has done the payment flow MI feature Made sure codebase was running (functionality and security) 11:14 week was straining so was difficult to work on project 11:15 athandwa Q: management by treasurer (change payment status missed) what is it comparing to?

	11:17 nothing about date - can be set by admin/treasurer but where is the date defined? Athandwa should try to implement the feature 11:20 sindy will define it in the codebase 11:21 contribution tracking linked to payment gateway? Need a direct button? 11:23 ask the agent in Github repo. It has information in this sprint
--	--

MEETING 3: 5 May 2026 (Whatsapp Meeting - no video call)

Meeting Transcription	[05/05, 16:06] Athandwa: Good afternoon, I won't be able to attend the standup tonight due to something I need to handle. What I've been able to do is to build cloud functions for real time updates What I'm left with is working on contribution status dispute and automated contribution reminders to members. 17:21 Owen: Hey guys, hope everyone is doing well. I'm saying this message as Just in case I'm not back on time for the meeting, I have to go to the hospital to see my mom. She got a procedure done. Luckily everything is fine, thank the Lord.
-----------------------	---

But I'm not sure exactly what time we're going to be back from the hospital, so I could be late to the meeting or completely miss.

So I'm very sorry but in terms of what I've been able to get done, just like I said, just in case I don't attend at all, I've managed to isolate some of the problems in the JavaScript files as well as the HTML files about why the groups are appearing on Firebase but not on like the Dashboard.

I do know how to fix it, so I will.

Luckily I figured out how to fix it so I will try and implement that by tomorrow.

And then I'm working on some other things.

So obviously making the expiration like.

What's it called?

Like the expiration logic for the invite, as well as trying to make it so that you don't need to just like log in to receive the invite.

You can maybe do it like maybe someone can send you an invite and it would come to you via email and you can accept it via email.

Trying to work on those little things as well because I think it's good to have that added functionality.

But yeah, no, so all.

All good on that part.

I should have the updated code.

I should like I'll try to update all the necessary JavaScript files and then push them hopefully by tomorrow latest.

But it's actually a really easy issue.

It's actually kind of embarrassing that I didn't see it.

But yeah, if this is only if I don't.

If I happen to not attend the meeting at all just to let you guys know that some progress has been made.

Okay, yeah, cool.

If I don't make it on time or at all, I hope you guys have a good meeting and yeah, bye bye.

18:14 **Sindy**: All right, guys.

We had to cut the meeting short because we only had, like, three people joining the meeting again today.

So I was just going to just say what we did.

So I. I finished 98% of my talks that I was supposed to do, and I pushed it.

The only thing that I'm left with is to finish testing my part.

But so far, all the test cases that I've done have been passing.

Yeah, I'm just trying to finish the last, I think, three things.

Three of the five things in testing, and then, yeah, I'm done.

Done.

Yeah, that's all

[05/05, 18:21] **Alondwe**: I've also done my part, I'm only left with testing it, i pushed it on Sunday to avoid pushing everything at once these are the files I pushed

backend/services/paymentService.js

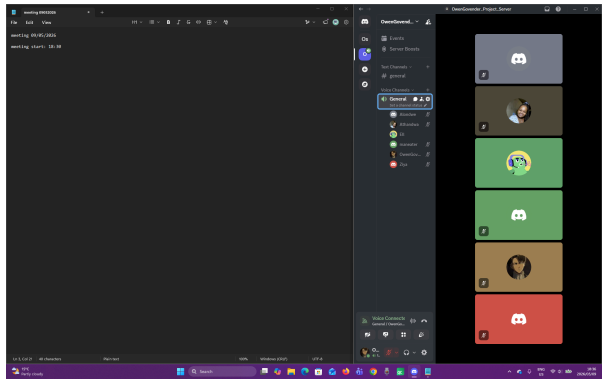

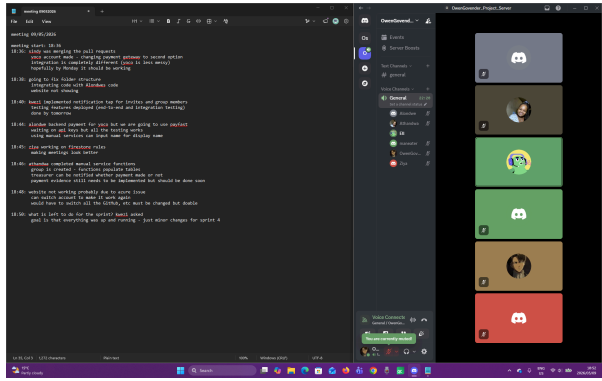

- backend/api/payments/ folder with all endpoints

- Updated firestore.rules with payment security rules

- docs/payment-api-spec.md - API documentation

Only left with the payment related tests

MEETING 4: 9 May 2026 (everyone attended)

Meeting Start: 18:36	
Meeting End: 18:50	
Meeting Transcript	meeting start: 18:36 18:36: sindy was merging the pull requests yoco account made - changing payment gateway to second option integration is completely different (yoco is less messy) hopefully by Monday it should be working 18:38: going to fix folder structure integrating code with Alondwes code website not showing 18:40: kwezi implemented notification tap for invites and group members testing features deployed (end-to-end and integration testing) done by tomorrow 18:44: alondwe backend payment for yoco but we are going to use payfast waiting on api keys but all the testing

	works using manual services can input name for display name 18:45: ziya working on firestore rules making meetings look better 18:46: athandwa completed manual service functions group is created - functions populate tables treasurer can be notified whether payment made or not payment evidence still needs to be implemented but should be done soon 18:48: website not working probably due to azure issue can switch account to make it work again would have to switch all the GitHub, etc must be changed but doable 18:50: what is left to do for the sprint? kwezi asked goal is that everything was up and running - just minor changes for sprint 4
